DESIGNED FOR SUCCESS

Do you have a challenging property? This Queensland specialist builder tackles the jobs most builders wouldn't dream of.

WHEN IT COMES to creating a new home, many people assume that building on locations with spectacular views or inner-city postcodes is simply not worth the hassle.

The team at Evermore Designed Homes doesn't believe there's such a thing as "too hard"; they thrive on challenging and rewarding properties.

Traditionally, there are three types of difficult sites that people will avoid. It just so happens that these are the sites Evermore Designed Homes loves.

The first is sloped land. Many people will be deterred by the lack of vision it inspires and the extra building costs it incurs. Evermore Designed Homes works closely with clients to provide a cost-effective process and create a property with

value and enviable views worth the effort.

A major renovation project is something else people tend to avoid, as the thought of the project can be quite overwhelming.

However, thanks to the popularity of home renovation shows, many Brisbane homeowners are now looking to remodel their properties into something more modern and profitable.

Current popular renovations include the raising of properties for the addition of extra floors or garage ports and the demolition of certain aspects of the house to improve flow or incorporate a more

modern, open-plan design.

Evermore Designed Homes is also keen to tackle properties of all sizes; there's no home too big or too small for this dedicated team. They have a plethora of designs under their belt that prove living in a narrow lot can be more rewarding than you'd expect. Their design solutions consider the desire for maximum livability, space, privacy and the ability for the house to blend in with its surrounds.

ART FOR AMATEURS

WHEN I FINISHED unpacking the last box and finally sat down to admire my brand-new apartment, I realised something: I had absolutely no idea what to hang on the walls. After hours of trawling through social media for inspiration, I had an epiphany. Why should I spend my time searching for something simply to adhere to a trend?

Art is all about expression. Whether it costs \$50 or \$5000, whether it was painted by Picasso or a preschooler, only one thing matters: you have to want to look at it every day. Approach the process of buying art just like you would falling in love. If it will make you smile each time you walk past, buy it. It's as simple as that. Happy shopping!
